ADVISING A NETWORK COMPONENT FOR CONTROL OF COMMUNICATION SESSION CONNECTION THROUGH EMPLOYMENT OF ONE OR MORE COMMUNICATION SESSION RESTRICTIONS

ABSTRACT

An application server component of an apparatus that serves to maintain one or more communication session restrictions set by one or more administrators for one or more mobile communication devices. The application server component employs one or more of the one or more communication session restrictions to advise one or more network components for control of one or more connections of one or more communication sessions for one or more of the one or more mobile communication devices.
